

*RADT-AR, leaf suspended bogie.*

**Leaf spring suspended bogie – 6x2**

The RADT-AR is a leaf spring suspended bogie with bogie lift for 6x2 Rigid and Tractors. It features a 5-leaf parabolic spring with long stroke and progressive spring action, which combines strength and service life with good ride comfort.

The installation is adapted for heavy distribution and construction operations, where it gives a smooth, gentle progress and high stability on all types of road surface.

The RADT-AR is available for chassis height High with single or hub reduction.

It has dual wheels on drive and tag axle and equipped with roll stabiliser in front of the driven axle on Rigid.

**Specifications**

Type designation .....	RADT-AR
Bogie load:	
Tractor .....	19 tonnes
Rigid .....	19 or 21 tonnes
Load distribution .....	56/44 %
.....	52/48 %
Load distribution .....	10.6/8.4 tonnes
.....	11.7/9.3 tonnes
Suspension:	
5-leaf parabolic .....	RST-PAR1
Chassis height .....	High
