Foldable and slideable underrun protection in aluminum

The foldable and slideable rear underrun protection prevents smaller vehicles from becoming wedged under the truck in the event of a collision. The protection has a robust design and suits all available chassis heights. The bar ends are provided with rubber pads.

The foldable protection is primarily used for tippers with short overhang.

Fulfils Directive R58-02 and 70/221/EEC.

FEATURES AND BENEFITS

- Shaped to avoid dirt build up.
- Mounted from factory, which saves time for the customer.
- The protection can be folded up when there is a need for a better ground clearance.
